Competitive Positioning (EN)

One-line position

Nova = AI marketing creative production platform (project delivery + flywheel + 400+ capabilities + enterprise SaaS)—not a general-purpose chat agent.

Comparison matrix

Type	Strengths	Gaps vs Nova	Nova talk track
General chat (ChatGPT, etc.)	Ubiquitous, strong Q&A	No project space, no flywheel, weak file acceptance	"We deliver campaign folders, not chat logs."
Developer agents (Claude Code, etc.)	Code & reasoning	Weak marketing, GEO, design systems	"Flywheel and templates for marketers out of the box."
Copy AI (Jasper, etc.)	Copy templates	Weak research, multimodal, China social	"Research through publish on one platform."
Design tools (Canva, Figma AI)	Fast visuals	Weak strategy, GEO, monitoring	"150 design systems plus upstream strategy."
Marketing clouds (HubSpot, etc.)	CRM, attribution	Creative agent orchestration not core	"Creative production layer; export files to your stack."
Workflow builders (Coze, Dify)	Flexible	Needs engineers; few marketing templates	"Marketers click templates—no node wiring."

Strategy

Avoid: generic Q&A leaderboard, raw coding-agent mindshare.

Attack:

1. End-to-end **marketing file delivery**
2. **GEO** visibility in the AI-search era
3. China-friendly multimodal (Qwen, Volcano, social matrix skills)
4. **Deployable enterprise** story (tenant, cloud, usage, private)

Objection handlers

They say	You say
"We have ChatGPT Enterprise."	"Enterprise secures chat; Nova delivers campaign projects and flywheel orchestration."
"Canva is enough."	"Canva is fast on visuals; Nova covers research → GEO monitoring; Canva fits the creative step."
"We'll build on Dify."	"Dify needs engineers; Nova gives marketers ~30 templates tomorrow."
