

Messaging House (EN)

Messaging House (EN)

L1 — Brand promise

Deliver complex projects through conversation.

L2 — Three pillars

1. **Six-stage marketing flywheel** — research → strategy → creative → reach → publish → monitor
2. **400+ ready capabilities** — five hubs: marketing, office, creative, dev, education
3. **Enterprise SaaS** — multi-tenant cloud, usage audit, private deploy option

L3 — Proof points

- Smart routing: up to ~70% token savings
- ~30 end-to-end workflow templates
- GEO/AEO across flywheel stages
- Per-tenant cloud storage + JWT + tool permissions
- 150 Open Design systems
- Deliverables previewable in chat

Taglines

Level	Copy
Primary	A conversation-driven AI workspace for complex work in natural language.
Vertical	AI marketing creative production — flywheel, 400+ capabilities, enterprise-ready.
Efficiency	Smart routing saves tokens; long tasks auto-recover without breaking flow.
Enterprise	Multi-tenant cloud creative platform — deploy with confidence.

Elevator pitches

30 seconds

Nova Ai-Studio delivers whole projects from one sentence. Marketing teams run a six-stage flywheel with 400+ try-ready capabilities and ~30 templates. Enterprise edition adds tenant isolation and cloud files; smart routing saves up to ~70% on tokens.

space with preview in the thread.

We focus on **marketing creative**, not generic agents: flywheel stages, templates for campaigns and GEO, unified model pool (GPT, Claude, Gemini, Qwen, Seedream, etc.).

For enterprises: tenant isolation, cloud hubs, admin usage. For cost: routing sends hard steps to flagship models and light work to efficient models.

5 minutes

Add market context (GEO, multimodal demand), business model (subscription + credits), and phased GTM (private deploy → beta SaaS → public cloud). See [上市路线三阶段](#) (ZH).
